Web Developer – Homepage Redesign Assessment

Practical Website Development Assessment

Company: Xntrova Technologies
Assessment Type: Onsite Practical Assessment
Duration: 3 Hours

Existing Website

Please review the existing Xntrova website before starting the assessment:

https://www.xntrova.com/

Task

Redesign and develop the **homepage of Xntrova Technologies**.

You are required to create a modern, professional, responsive homepage that represents a digital marketing and technology agency.

You may review the existing Xntrova website to understand the current structure, services, content, and brand identity.

The objective is to **improve the overall user experience, presentation, and conversion flow** while maintaining the core brand identity.

Homepage Should Include

The redesigned homepage should include relevant sections such as:

- Header / Navigation
- Hero Section
- Services
- About Xntrova
- Why Choose Us / Key Benefits
- Process / How We Work
- Portfolio / Case Studies
- Client Testimonials

- Call-to-Action
- Contact / Lead Form
- Footer

You may modify the structure or add/remove sections if you believe a different approach provides a better user experience.

Development Requirements

Responsive Design

The website must work properly on:

- Desktop
- Tablet
- Mobile

Functionality

Implement appropriate functionality such as:

- Responsive navigation
- Mobile menu
- CTA buttons
- Contact/lead form
- Hover interactions
- Smooth scrolling
- Basic animations
- Interactive sections where appropriate

Technical Requirements

- Clean and maintainable code
- Reusable components where applicable
- Proper HTML structure
- SEO-friendly heading structure
- Optimized images/assets
- Good page performance
- No unnecessary dependencies
- Cross-browser compatibility

Technology

You may use the technology relevant to the position:

- HTML
- CSS
- JavaScript
- React
- Next.js
- WordPress/PHP

Design Expectations

The homepage should feel:

Modern • Premium • Professional • Minimal • Conversion-focused

You are encouraged to improve the existing user experience rather than simply reproducing the current website.

Submission

Please submit:

1. Complete source code
2. GitHub repository
3. Live/deployed URL, if available
4. Brief explanation of the major changes made

Important

This assessment is intended to evaluate your **practical website development skills**.

We will primarily evaluate:

- Quality of development
- Responsive implementation
- Technical execution
- Code structure
- Functionality
- Performance
- Attention to detail
- Ability to improve an existing website experience

You may use AI-assisted development tools, but you should be able to **explain the code and implementation decisions** during the technical discussion.
